

Software Engineer

We're looking for a **Software Engineer** to join our united, dedicated, and enthusiastic team at LINK Mobility, Europe's leading provider of mobile messaging.

At LINK, we connect businesses to customers through our communications products and services that drive engagement and satisfaction during each stage of the customer journey.

You're probably already familiar with us: we're behind the messages you receive via SMS, WhatsApp, email, or even to check-in for your upcoming flight, receive delivery notifications, cash in a mobile coupon to your favorite store, and so much more.

It's an exciting time to join LINK as we develop our award-winning communications platform as a service (CPaaS) offerings in this rapidly advancing tech industry.

As a Software Engineer, you'll be joining our UK engineers to build and maintain a robust messaging solution. As part of our team, you'll be delivering software solutions using a variety of technologies and programming languages. Expect to tackle a variety of challenges, from troubleshooting and resolving operational issues to creating and rolling out thrilling new features that will delight users. It's a rewarding and customer focused environment where your contributions will make a real impact.

YOUR RESPONSABILITIES

- Participate in the entire production life cycle of backend and frontend applications for our messaging business (full-stack development)
- Help the support teams diagnose and resolve technical queries from customers
- Maintain solutions and resolve operational issues as they arise
- Work closely with the rest of the team to implement features on our roadmap
- Ensure the best performance, quality, cost efficiency possible of the applications
- Share information with the rest of the team and provide solid technical documentation

REQUIRED SKILLS & EXPERIENCE

- 5+ years of professional experience building and maintaining web applications
- Understanding of relational and non-relational databases
- Knowledge and hands-on experience with a cloud provider like AWS or Google
- Understanding of software and security best practices
- BS/MS degree in computer science, software engineering, or equivalent with programming experience in multiple languages
- Experience monitoring and managing highly available applications
- Experience building and maintaining APIs
- Experience with PHP, Node.js, MongoDB
- Database administration experience
- Linux server administration experience
- Based in the UK

VALUABLE BUT NOT REQUIRED

- Experience with SQL, Redis, RabbitMQ, Knockout.js and Tailwind.css
- Experience building web interfaces

WE CAN OFFER YOU

- The ability to work remotely or option to be in our offices in Cornwall / Doncaster
- A dynamic, international work environment
- Growth opportunities supporting personal and professional development
- Contribution to health coverage
- Eligibility to enroll in LINK's employee share purchase program, which provides a 20% discount on company stock purchased by permanent employees

*All benefits are subject to local terms and regulations and may be changed during the employment

LOCATION: UK

Apply as soon as possible. Applications are evaluated on an ongoing basis.

LINK Mobility is publicly listed on the Oslo Stock Exchange with offices in 18 countries throughout Europe. We continue to experience strong organic growth and recurring revenue as businesses move more activities onto mobile platforms. In 2023, LINK Mobility had a total turnover of 6.3 billion NOK.

Every employee is an important member of LINK Mobility. We do not tolerate discrimination of any kind – whether active or passive – based on ethnicity, national origin, religion, disability, gender, sexual orientation, marital or parental status, union membership, political views, age, or any other characteristic that results in compromising the principle of equality. LINK regards diversity as a lever for innovation and profitability.
