

UI Designer

We're looking for a **passionate and detail-oriented UI Designer** to join our **dynamic, collaborative, and cross-functional design team** at **LINK Mobility**, Europe's leading provider of mobile messaging and customer engagement solutions.

At LINK Mobility, we help businesses connect with their customers through smarter digital communication - whether it's a **delivery notification, flight update, payment reminder**, or a **personalized WhatsApp campaign**. Our technology powers millions of daily interactions that make customer experiences smoother, faster, and more personal.

Now is the perfect time to join us. We're expanding our **award-winning CPaaS (Communications Platform as a Service)** ecosystem and investing heavily in our **Enterprise Portal** - a core B2B platform used by enterprises across Europe to manage communication flows, analytics, and customer engagement in one unified space.

Our **UI/UX team** plays a **transversal role** within LINK Mobility - collaborating closely with **Product, Engineering, and local teams across 17 countries** to create a unified design language and deliver world-class interfaces across our suite of digital products. You'll work in a truly **international and collaborative environment**, where creativity and curiosity are encouraged every day.

What You'll Do

- Design **intuitive, elegant, and scalable interfaces** for our Enterprise Portal and related CPaaS products.
- Translate complex, technical requirements into **simple, human-centered designs** that empower business users.
- Develop **wireframes, interactive prototypes, and high-fidelity mockups** that communicate ideas and interactions clearly.
- Partner closely with **UX Designers, Product Managers, Developers, and local design teams** to ensure consistency and alignment across products and markets.
- Contribute to the evolution of our **design system**, ensuring visual coherence and usability across the entire product ecosystem.
- Stay ahead of **UI trends, frameworks, and best practices**, helping us continuously raise the bar for visual design and experience quality.

What We're Looking For

- **5+ years of experience in UI design**, ideally in **B2B SaaS or enterprise software environments**.
- Proven ability to create **clean, functional, and visually refined interfaces** for data-rich or complex systems.
- Experience working on **large-scale digital products** or platforms with multiple stakeholders.
- Strong grasp of **design systems, responsive design, and accessibility principles**.
- Bachelor's degree in **Graphic Design, Interaction Design, HCI**, or equivalent experience.
- **Fluent English** communication skills (written and spoken).

You'll Thrive Here If You Are

- **Collaborative and communicative**: You enjoy working in a cross-functional, international setup and believe great design comes from great teamwork.
- **Empathetic**: You understand B2B users - their needs, goals, and challenges and design interfaces that simplify their daily work.
- **Curious and growth-minded**: You stay open to feedback, learning, and experimentation.
- **Meticulous**: You care deeply about details, visual harmony, and usability.
- **Strategic thinker**: You balance user needs, business objectives, and technical constraints to design impactful solutions.
- **Positive and proactive**: You bring energy, initiative, and passion to every project you take on.

What We Offer

- Competitive salary and **benefits aligned to your location** (Spain, Italy, or Portugal preferred).
- **Flexible working hours** and **remote-friendly environment**.
- Work on **high-impact, visible products** used by thousands of business customers across Europe.
- **Continuous learning opportunities** and professional growth.
- A **diverse, international, and innovation-driven culture** that values creativity and teamwork.

Location: Spain, Italy, or Portugal (remote/hybrid).

Apply today! Applications are reviewed continuously.
