

Freelance - Senior Developer .net / Angular

LINK Mobility Group AS is one of Europe's leading providers within mobile communications, specializing in CPaaS, mobile messaging services, and mobile solutions. The Group offers a wide range of scalable services and solutions across industries and sectors due to a growing demand for digital convergence between businesses and customers, platforms, and users. The Group is headquartered in Oslo, Norway and is publicly listed on the Oslo Stock Exchange. LINK Mobility continues to experience strong organic growth with a high degree of recurring revenue, as customers tend to move more business activities onto mobile platforms. In 2019, LINK Mobility had a total turnover of 2.9 billion NOK with offices in 17 different countries.

Senior Development Engineer - .NET / Angular

@LINK Mobility we live by three core values that drive our business and people: United, Dedicated and Enthusiastic. When working @ LINK you appreciate diversity, cross-border collaboration and solving complex challenges in a high growth environment. Our people are knowledgeable, curious and agile team players who strive to consistently deliver the best mobile messaging solutions for our customers.

Position overview

As a Senior Development Engineer, you will join our R&D team composed of experienced software engineers following Scrum methodology and working hand-in-hand with Product Marketing team to build innovative and robust messaging solutions running on AWS cloud.

Responsibilities:

- Participate in the definition and analysis of needs,
- Conceive efficient, scalable, reliable, and reusable code. Implement and promote best software engineering practices: design patterns, security by design, responsive design, TDD...
- Participate in the entire production life cycle of backend and frontend applications for our messaging business (full-stack .NET + Angular using AWS serverless/managed services),
- Ensure the best performance, quality, cost efficiency possible of the applications,
- Share information with the rest of the team and provide solid technical documentation.

Your Experience:

- 10+years of professional experience in .NET / ASP.NET, Angular and modern JavaScript, HTML and CSS.
- Genuine enthusiasm for front end engineering - UI polish, performance, accessibility - and a strong desire to keep learning in this area. Solid grasp of UI/UX fundamentals is a must; able to translate wireframes into production ready interfaces.
- Strong understanding of algorithms, security practices, networking, and design patterns.

Your Qualifications:

- Engineering studies
- Fluent English for daily collaboration (both written and spoken).

Our Perfect Match:

- High energy, driven and a strong desire for success,
- Business-oriented with the ability to understand the value chain and business model of the customers,
- Excellent communication and interpersonal skills,
- Positive attitude, and ability to create enthusiasm and dedication among colleagues and customers,
- Integrity and courage to speak up when required, - while keeping calm in demanding situations.

Other information:

- Freelance contract
- Position based in Boulogne-Billancourt or 80% remote working if you live outside the Paris region.

Every employee is an important member of the LINK Family. We do not accept any discrimination, whether active or by means of passive support, whether based on ethnicity, national origin, religion, disability, gender, sexual orientation, marital or parental status, union membership, political views, age or any other characteristic that results in compromising the principle of equality. LINK Mobility regards diversity as a lever for profitability.
